

ANEESULLAH

Data Analyst | Junior Data Scientist

Orakziyan456@gmail.com | +971 50 313 9092 | Sharjah, UAE | Pakistani

Professional Summary: Results-driven Data Analyst with hands-on expertise in ETL pipeline development, SQL data warehousing, and machine learning. Demonstrate improvements in data quality by 35% through advanced preprocessing techniques. Translate complex datasets into actionable insights using Python, SQL Server, and statistical analysis. Collaborate with cross-functional teams to deliver AI-powered solutions and produce technical documentation. **Currently in Sharjah, UAE, on a visit visa, will relocate and join immediately.**

SKILLS

Data Analytics: SQL, ETL/ELT Pipelines, Data Warehousing, EDA, Statistical Analysis, KPI Development, A/B Testing

Programming: Python (Pandas, NumPy, Scikit-learn), SQL, Flask, Streamlit
Databases: SQL Server, PostgreSQL, MySQL, Query Optimization, Stored Procedures, Star Schema, Medallion Architecture

Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, XGBoost

Visualization: Excel (Advanced, DAX, Power Query) NLP: spaCy, Transformers (BERT)

EXPERIENCE

NovaXccelerate — May 2025 – Aug 2025

- Engineered a SQL data warehouse using Medallion Architecture (Bronze, Silver, Gold), structuring 100,000+ records for analytics.
- Built end-to-end ETL pipelines in SQL Server, automating data ingestion, cleansing, and incremental loading processes.
- Created optimized fact/dimension tables with star schema design, reducing query execution time by 40%.
- Implemented data quality validation checks, ensuring 99% accuracy; generated analytics-ready datasets for BI reporting.

Artificial Intelligence Intern

Cedrus Group Pvt. Ltd. — Jun 2025 – Nov 2025

- Preprocessed 50,000+ records using Python (Pandas, NumPy), improving data quality by 35% through advanced cleaning techniques.
- Evaluated ML algorithms (Logistic Regression, Random Forest, XGBoost), documenting accuracy, precision, recall, and F1-score.
- Conducted feature engineering and EDA using statistical methods to identify patterns and optimize model performance.
- Supported LLM-based application development through prompt engineering, testing, and technical documentation.

Education

Bachelor of Science in Artificial Intelligence

Hazara University | Graduated 2025 | Coursework: Machine Learning, Data Mining, Database Systems, Statistics

Key Projects:

Modern SQL Data Warehouse/ SQL Server, ETL, Medallion Architecture

- Architected enterprise data warehouse with Bronze/Silver/Gold layers; built automated ETL pipelines for daily incremental loads.
- Designed dimensional models with SCD Type 2, optimized queries, and achieved sub-second performance on 100K+ records.

CampusGPT — University Assistant/ Python, NLP, Flask, spaCy, BERT

- Developed an AI chatbot handling 500+ queries using spaCy and transformer models, achieving 85% accuracy. Built a RESTful API backend with Flask; designed a responsive frontend, improving user experience by 30%.

Credit Card Fraud Detection/ Python, Scikit-learn, ML

- Built classification models on 180K transactions; applied SMOTE for class imbalance, achieved 94% precision, 89% recall.
- Performed hyperparameter tuning with GridSearchCV; deployed model via Flask API for real-time prediction.

Additional Information

Languages: English (Fluent), Urdu (Native), Pashto (Native)

Attributes: Strong analytical skills, effective communicator, self-motivated learner, collaborative team player, adaptable to fast-paced environments
